

Tourism Government — Verified 11-Service Production Architecture Blueprint

100% Accurate Local Repository Map: Config Servers, Gateway Routing, Feign Communication Hops & Database Isolation

VERIFIED SYSTEM ARCHITECTURE PORT DEPLOYMENT DIRECTORY & FEIGN HOPS:

- **Verified Config Ports:** Gateway API (Port 8383), Config Server (Port 8181), User (Port 1111), Site (Port 3030), Compliance (Port 6060), and Booking (Port 4040).
- **Dynamic Feign Hops:** Declarative Feign clients trigger inter-service queries in memory, protected by Resilience4j fault tolerance fallback classes.
- **Central Configs:** Spring Cloud Config Server serves central application properties directly from Git to all 9 active microservice bootstrap endpoints.
