

Tourism Government — Request Workflow & Systems Architecture Diagram

Highly Focused End-to-End Tracing: Configurations, Client Requests, API Gateway Routing & Service Relational Schemas

SYSTEM WORKFLOW PHASES:

- Phase 1 (Configs): Config Server (8181) pulls settings from Git and loads them to all bootstrap services.
- Phase 2 (Request): React client (5173) sends Axios requests with security JWT header to the API Gateway (8383).
- Phase 3 (Routing & Hop): Gateway resolves routes via Eureka (8761), forwards to Report Service (9090), which does a Feign hop to User Service (1111).
