

Tourism Government — Production Microservices Architecture Blueprint

Enterprise Design: Verified Config Ports, Inter-Service Feign Hops & Database-per-Service Isolation

VERIFIED SYSTEM ARCHITECTURE PORT DEPLOYMENT DIRECTORY & FEIGN HOPS:

- **Verified Config Ports:** Gateway API (Port 8383), Config Server (Port 8181), User (Port 1111), Site (Port 3030), Compliance (Port 6060), and Booking (Port 4040).
- **Dynamic Feign Hops:** Declarative Feign clients trigger inter-service queries in memory, protected by Resilience4j fault tolerance fallback classes.
